Roller Centralizer

- The roller centralizer is with rigid body and straight or spiral blade.
- The centralizer body is processed by casting, the rollers is alloy steel and then heat treatment.
- Duo to the low friction feature and roller,it is easy to run between roller and inside of casing.
- The roller centralizer is used in horzontal or deviated well to centre casing.
- This kinds of centralizer can remove the wellbore stone and make the mud flow easily.
- The roller provides high wear resistance and has long life for centralizer.
- Our centralizer coating is powder baking in high temperature.
- The roller centralizer sizes are from 4-1/2inch to 20inch,any special sizes are available according requirement.

Left: Straight Blade Roller Centralizer
